

Data Sheet

Lanyard Flex (1.7m/1.8m)

Lanyard with new shock absorber, with a large weight range of 50kg - 140kg. Realizes always a maximum impact force of less than 6kN.

The lanyard with shock absorber is part of the personal protective equipment against fall and it should belong to the user personally. It consists of a shock absorber, a Flexband and a carabiner as the end connection with which a safety harness can be connected to a stop device. The Lanyards are available in the standard or Y variant and with different carabiners.
